

CLEAR WATER

VWP WATER PROCESSOR™

ENVIRONMENTALLY FRIENDLY
& REDUCES ENERGY COSTS

- NO WASTE OR MAINTENANCE

- USE 70% LESS CHLORINE
- PREVENTS LIME SCALING
- REMOVES CALCIUM DEPOSITS
- REDUCES BUILD UP ON POOL WALLS
- NO MAINTENANCE OR RUNNING COSTS
- REDUCES BACTERIA

SOFT WATER

Aquatics & Leisure

VWP AQUASOUND™

Our scientists from Sweden, have developed a new environmentally-friendly water processing system which uses a frequency resonance technology. This technology, in addition to eliminating common hard water problems (calcium oxide, iron, copper, nitrate, nitrite, and manganese), eliminates scaling, minimizes chemicals (chlorine, etc.), reduces bacteria and produces an oxygenated “living” water. This “living” water becomes self cleaning and also retains healthy minerals and elements which is an exceptional source of nutrition for humans, plants, animals and fish.

TECHNOLOGY HOW DOES IT WORK?

The VWP AquaSound™ ionizes the water using a special frequency resonance technology. This technology releases electrons from the water molecules which oxygenates the water, oxidizing impurities such as iron and copper; converting them into small harmless crystals. The lime in the water will also be crystallized, eliminating scaling and deposits. Also, older deposits will dissolve and the water will become “soft” without removing the vital minerals. If chlorine is present in the water, it will be reduced to a harmless level.

- USE 70% LESS CHLORINE
- PREVENTS LIME SCALING
- REMOVES CALCIUM DEPOSITS
- REDUCES BUILD UP ON POOL WALLS
- NO MAINTENANCE OR RUNNING COSTS
- REDUCES BACTERIA

ENVIRONMENTALLY FRIENDLY

The VWP Water Processor™ and patented design, does not use any power, chemicals or additives and there are no replacement parts or waste. Plants and animals will benefit from the oxygenated water and all drainage water that has passed through the processor will be sent into nature in a cleaner form. In addition, your output and water usage will be greatly reduced.

EASY TO INSTALL
No need to cut pipes, replace parts or maintenance.

AQUASOUND

The AquaSound™ is ideal for private pools, basins, ponds, fountains, water tanks.

WATER FOR SHOW

Above Top: Pool, Left Above: RV, Right Above: Yacht

Kristianstad City Hall VWP Water Processor™ successful installation in Sweden.

Illustration of growing fish

USE OF 70% LESS CHLORINE

The chlorine content in pools can be reduced up to 70% with the use of an AquaSound™ Water Processor. The smell of chlorine is also neutralized and there will be less maintenance due to minimal deposit build-up on pool walls. Also in combination with a VWP300™ on the recirculating water pipes, there will be no scaling in pipes.

RV WATER SUPPLY

The AquaSound™ Water Processor placed in a RV water tank, will minimise bacteria and take away bad smelling or bad tasting water.

WATER TANKS ON YACHTS & SHIPS

Cruise ships, yachts and other vessels often have stale tasting drinking water and problems with uric scaling from toilets inside pipelines and organic waste storage. These problems are easily solvable using customized solutions of the VWP technology.

FOUNTAINS LESS MAINTENANCE

Fountains have to be stopped and maintained regularly due to calcium scaling and clogged nozzles. The AquaSound™ in combination with the VWP300™ will drastically reduce maintenance and congested water outlets and spray nozzles.

HEALTHIER AQUARIUM FISH & PLANTS

The VWP Water Processor™ regulates, to some extent, the growth of micro-organisms in the water. It will increase maintenance intervals of aquariums and ponds. It also provides oxygenated water without removing trace minerals - healthy for aquarium fish and plants.

AQUATICS & LEISURE

AQUASOUND

For private pools, basins, ponds, fountains, water tanks.

INSTALLATION

The VWP AquaSound™ for pools installs easily on the ladder. Use in combination with a VWP300™ on the recirculating water pipes for optimum results.

VWP100

For apartments, kitchens or bathrooms.

VWP200

For households < 200m² (2150 ft²)

VWP300

For estates > 400m² (4300 ft²)

WHAT ABOUT SALT CONDITIONERS?

It has been recently discovered, that salt based systems pollute the fresh ground water supply during the back-washing or regeneration process. This has caused many communities in the USA (primarily California) to ban salt-based or automatic water softeners. In addition, they are very expensive and require extensive maintenance.

The VWP Water Processor™ is environmentally-friendly and water that is sent into nature is in a cleaner form. It also does not require a plumber to install, electricity, salt or maintenance.

WHY USE A FILTER?

Filters must be changed often to reduce the risk of bacteria growth and microorganisms. If not changed regularly, you may be consuming water that has a lower quality than before the filtration. Changing filters involves a continuing cost for replacement filters.

The VWP Water Processor™ has no replacement parts, requires no maintenance (no running costs) and generates no waste products. The system is also easy to install without the cost of a plumber.

PURE WATER WITH REVERSE OSMOSIS?

Reverse Osmosis creates ultra-clean water. Unfortunately, this ultra-clean water is also missing minerals and useful trace elements normally found in healthy living water. Essentially the final product is a sterile water. They also need expensive membranes replaced on a regular basis.

The VWP Water Processor™ creates a self-cleaning water that still retains essential minerals and elements which are nutritionally healthier for humans, animals, fish and plants. The water processor also does not require professional installation, maintenance, electricity or additives.

HEARD OF ELECTROMAGNETIC SOFTENERS?

Electrical devices require power, which have running costs and will stop working if the power goes out. They are also only primarily effective with calcium related problems.

The VWP Water Processor™ is more effective for lime scale removal and also reduces bacteria and oxygenates the water. In addition, it does not require power and has no running costs or maintenance.

BENEFITS AQUASOUND

- The VWP AquaSound™ and VWP Water Processor™ are easy to install.
- No maintenance or running fees.
- Saves money due to better performance and less maintenance.
- Better quality pools; smell of chlorine is neutralized, less maintenance due to less deposit build-up on pool walls, and the use of chemicals is reduced.
- Reduced discoloration from iron and copper.
- Oxidizes iron and copper and reduces other impurities.
- Provides oxygen balance to aquariums which fish and plants need to thrive.
- Oxygenation increases fish and plants intake of nutrients to their cells resulting in healthier fish and a stronger root system.
- No lime deposits on aquarium walls means easier to maintain.
- The oxidation process eliminates odor and bad taste from water.
- Dissolves old deposits in pipes and water heaters and prevents new ones from forming.

AWARDS EUREKA - BRUSSELS

The VWP Technology won a Silver Medal at the Eureka International Innovation Contest in 1998. The renowned international Eureka contest brings together delegations from more than 25 countries to present their patented inventions and new ideas and is first and foremost a propitious place for professional exchanges with energy being the star player. www.brussels-eureka.be
